NEW!

1 3/4 Yard

A recent customer survey concluded that many jobs use more than 1-yard of concrete. The MixKing is the perfect tool for these projects! The MixKing will save you money by reducing the trips from the plant to the jobsite.

- The MixKing is a 10,000 GVW trailer.
- The MixKing can carry 1 3/4 Yards.
- The MixKing uses a positive-lock drum cover.
- The MixKing has 6 ply radial tires.
- The MixKing has optional on-board water.
- The MixKing can be pulled by Full-Size Pick-ups

Both the Cart-Away® standard 1-yard trailer and the MixKing™ use quality components. All Cart-Away® products are assembled with care in the USA.

Both use the industry leading GearSaver™ knob for increased gearbox life.

Both use the TandemFlex™ fenders to save on dented fenders. Both use the bullet-proof Honda engines and a hydraulic system to work all the functions.

Standard 1 yard

Both use powdercoating to protect the finish of the drum. The MixKing uses a stronger pintle hitch system and the 1-yard trailer uses a 2" ball hitch.

Both trailers are a great investment and have the backing of the world's largest producer of trailer-based concrete equipment, Cart-Away Concrete Systems, Inc.

- 10,000 GVWR or 1¾ cubic yard capacity
- Precision rotating drum
- 13 hp Honda Engine
- Heavy Duty Auburn Gearbox
- Ross hydraulic motor
- 4 wheel free-backing brakes
- Vari-height adjustable tongue
- Standard Pintle ring
- GearSaver Knob for gearbox protection
- Hydraulic surge brakes (electric brake option)
- Load range D ST225/75 15" radial tires 2540# rating
- Empty weight 2,700 lbs
- Dimensions 15'4" L x 5'7" W x 6'10" H
- Tandem 5200lb. axles
- D.O.T. Approved lights
- Uni-body hydraulic mix control valve
- Tubular ASTM-A36 structural steel frame
- Plastic Tandemflex fenders

THE MixKing ADVANTAGE

A Single-Axis Rotating Drum

Is essential for a mixing drum that will not spin itself to destruction. **No other feature is important if the drum does not spin straight!**

Precision Drum Parts

Are fitted with jigs exclusive to Cart-Away that allow our technicians to prepare the drum for welding

GearSaver Knob

This one exclusive feature will save you \$1000 in gearbox replacement due to customer misuse.

The Heavy Duty Ross Motor

reduces the possibility of breaking a shaft key or destroying a gearbox. These items keep the drum spinning and **a drum full of concrete that is not spinning is a recipe for disaster!**

A Heavy-Duty Gearbox

like the Auburn has larger gears and spindles that increase torque capacity, give greater torsional loads and produce a longer life than those in lesser gearboxes.

Uni-Body Hydraulic Valves

Are more efficient, give longer service life and are completely rebuildable.

Tandemflex Fenders

Tough, thermal polyolefin plastic fenders like those used on motorcycles and ATVs.

A piece of rotating equipment that is not round tries to tear itself apart with every revolution. Cart-Away takes great pains to ensure its drums are round. This makes for the longest life equipment in the industry.
